

Announcing the next Intel® Industry Solution Builders Challenge for AI Edge Applications

intel ai

Call for Independent Software Vendors (ISVs) and application builders to create and advance AI edge solutions using Intel technologies. For more information, scan the QR code or please email isbc@intel.com

PARTICIPATE

ISVs and solution builders with deployable AI applications that address edge use cases are invited to participate.

COLLABORATE

All participants will have the opportunity to access resources and can directly engage with Intel Subject Matter Experts to help address their business, technical, and marketing needs.

BENEFITS & INCENTIVES

Qualified AI edge applications will receive incentives and opportunities in the areas of Co-Branding, Co-Marketing, Co-Development and Co-Selling.

Develop and Optimize with Intel

Build and scale AI Edge Applications on Intel® AI Edge Systems

Intel Processor-Powered Hardware

Intel® AI Edge Systems are designed to deliver high-performance, cost-effective computing capabilities directly at the edge of networks enabling real-time data processing and decision-making for AI workloads.

Intel AI Edge Systems initiative is offering:

- Roadmap, reference design and system sizing guide
- Support services for architecture conversion, tuning and benchmarking
- Verified Reference Blueprint and system verification
- Use cases and application on-boarding
- Partner endorsement and Go-To-Market

Accelerate development of AI Edge Applications with Intel Open Edge Platform

Open Edge Platform

The Open Edge Platform is a modular, open source platform that simplifies the development, deployment and management of edge and AI applications at scale.

- Edge AI Suites that enable solution builders with a set of industry specific curated components to scale industry solutions faster
- Edge AI Libraries that enable builders to select from a wide range of optimized libraries, microservices and more

Solve Your Customers' Unique Business Challenges

Examples of industry-specific AI edge application use cases

Retail

- Loss Prevention
- Order Accuracy
- Self-Checkout

Healthcare

- Genomics Informed
- Image Analysis
- Virtual Care

Education

- Digital Campus
- Immersive Learning
- Intelligent Learning

Manufacturing

- Anomaly Detection
- HMI: Augmented Worker
- Operations Diagnostics
- Predictive Maintenance
- Process Optimization
- Quality Inspection & Assurance
- Vision Guided Robots
- Worker Safety

Video, City Safety and Security

- Advanced Video Search
- Intersection Management
- Live Avatar Interaction
- Live Video Stream Analysis
- Natural Language Search
- Smart Parking
- Smart Tolling
- Video Summarization
